

CLEANING INSTRUCTIONS FOR REGENCY

CLEAN LIQUID SPILLS QUICKLY WITH A DRY, CLEAN, ABSORBENT CLOTH. FOR LIQUIDS STILL BEADING UP:

- GENTLY BLOT (DON'T RUB) A SPILL IMMEDIATELY WITH A CLEAN, DRY, ABSORBENT CLOTH
- NO RINSING NEEDED

IF ANY RESIDUAL SPOT REMAINS, RINSE FREELY WITH WARM WATER:

- REMOVE ANY EXCESS SOIL OR DEBRIS FROM SURFACE. FLUSH SOILED AREA LIBERALLY WITH WARM WATER THEN BLOT WITH A CLEAN, DRY, ABSORBANT CLOTH.
- CHANGE TOWEL SURFACE FREQUENTLY UNTIL SPOT IS GONE. TRY TO AVOID BRUSHING WHICH CAN SPREAD THE STAIN; KEEP REPEATING THE PROCESS UNTIL THE SPOT HAS BEEN REMOVED.
- REPEAT AGAIN BY RINSING WITH WARM WATER AND THEN BLOT CLEAN, DRY CLOTH AS NEEDED.
- IT IS OK TO USE A WATER EXTRACTION MACHINE IF DESIRED (FOLLOW DIRECTIONS ON MACHINE)

FOR DIFFICULT OR STUBBORN STAINS:

- FOLLOW STEPS ABOVE ... THEN USING 2-3 DROPS OF A MILD DISH WASHING DETERGENT WITH A CUP OF WATER, APPLY TO THE SOILED AREA.
- GENTLY WORK THE SOLUTION INTO THE AREA, WAIT A MINUTE AND BLOT THE SPOT WITH A CLEAN, DRY, ABSORBENT CLOTH. REPEAT UNTIL SPOT HAS BEEN COMPLETELY REMOVED.
- AFTER CLEANING, BE SURE TO RINSE THOROUGHLY WITH WARM WATER AND BLOT TO REMOVE ANY SOAP RESIDUE.
- ANY REMAINING SOAP NOT RINSED AWAY IN THE FABRIC CAN CAUSE A REOCCURRING STAIN.

LAUNDERING TIPS

- DO NOT WASH IN WATER TEMPERATURE ABOVE 120 DEGREES OR 160 DEGREES FOR HEALTHCARE
- DO NOT USE HARSH DETERGENTS OR SOLVENTS
- DO NOT USE FABRIC SOFTENERS
- DO NOT USE CLEANERS CONTAINING OXIDIZERS
- LET AIR DRY OR TUMBLE DRY AT LOW TEMPERATURE SETTING
- IRONING MAY BE USED IF NECESSARY
