

# Perennials Cleaning and Care

For everyday maintenance and to best preserve the beauty of your Perennials product, we recommend the following:

Brush or vacuum any loose dirt from the surface of the product.  
If the fabric or rug has a nap, follow the direction of the nap.

---

To avoid staining, spills should be removed immediately.

---

Blot any excess liquid from the surface. Using a clean damp cloth or sponge, gently dab spot to remove remaining stain.

---

For more stubborn stains, apply a natural soap or a mild detergent such as Dawn®, Formula 409® or OxiClean® to the cloth and gently dab (avoid excessive rubbing to avoid damage to the surface).

---

Chlorine bleach will not affect the coloration of the solution-dyed acrylic fiber and is therefore acceptable for stubborn stain removal, including mildew. We suggest a diluted solution of one part bleach to two parts water. Please note that chlorine bleach is never recommended as a stain remover for printed fabrics or natural fibers (i.e. hemp), as it will affect the coloration of the print or natural fiber.

---

Rinse thoroughly with clean water and let air dry. (Acrylic does not support mildew growth; however, mildew may grow on dirt and residue that has not been removed from the fabric so thorough rinsing is essential.)

---

For pile fabrics, as a final step, comb the pile with a soft, bristle brush in the direction of the nap.

---

Professional dry cleaning is always recommended for tough stains. Any solvent except Trichloroethylene is acceptable; must use low heat during processing to avoid damage to the fibers.

---

Machine Wash Cold on Delicate setting | Bleach Cleanable • Hang to Dry  
Dry Cleaning: Use any solvent except tetrachloroethylene / Low Heat  
Iron at Low temperature
